

TORREY PINES TRAIL GUIDE

Please return this trail guide for reuse.

Torrey Pines State Natural Reserve® is a fragile wilderness island in an urban sea: home of our nation's rarest pine tree—*Pinus torreyana*—which is native only here and on Santa Rosa Island off the coast near Santa Barbara.

Guy Fleming Trail

$\frac{2}{3}$ mile loop

Easiest trail, relatively level, forested, along ocean bluffs, sandstone formations, spring wildflowers, drinking water, parking.

Parry Grove Trail

$\frac{1}{2}$ mile loop

Secluded, with steep entry/exit (100+ rugged steps). Few trees due to drought and bark beetle infestations. Native plant garden at trailhead.

High Point Trail

100 yards with steps

Panoramic views of reserve, ocean, lagoon, and inland.

Razor Point Trail

$\frac{1}{2}$ mile to overlook

Dramatic views of gorge, badlands, spring wildflowers. A few picturesque trees.

Beach Trail

$\frac{3}{4}$ mile to Flat Rock

Descends 300 feet to beach level. Final access to beach via stairs.

Broken Hill Trail

North fork $1\frac{1}{4}$ miles

South fork $1\frac{1}{3}$ miles

Reserve's longest trail, including access to the beach. Features chaparral, few trees, and scenic overlook pictured below.

View from Broken Hill overlook
